Watts Green

Green renewable energy is electricity produced in an environmentally friendly manner. Sources of green energy include the sun, wind, and water, which are pollution free and naturally reoccurring.

Renewable electricity technologies are among the cleanest and have the least impact on the environment.

Some of the renewable energy that is sold to our members is purchased from other members who have renewable energy systems.

Costs

The price for new green power is slightly higher than power generated from conventional sources such as coal and oil. Maquoketa Valley Electric Cooperative's Watts Green Renewable Energy Program enables you to support renewable energy by paying a small premium on your bill. The extra cost is currently 2 cents per kilowatt hour, or $1 for a 50 kilowatt hour block, which is applied only to that portion of renewable energy that is chosen.

Your participation in the Watts Green Renewable Energy Program will help provide incentive for others to produce green power.

Benefits

- **Quick to market.**
- **No air emissions.**
- **Needs no water.**
- **Zero fuel costs.**

Participation

To participate in the Watts Green Renewable Energy Program, detach and complete the attached form. The completed form can be returned with your energy bill or mailed separately to:

Maquoketa Valley Electric Cooperative
109 North Huber Street
Anamosa, Iowa 52205
