

WEATHERIZATION

Requirements:

- Rebates based on heating source.
- Home must be built prior to 2000.
- Must be upgraded to existing home (new additions do not qualify).
- Project cost must be \$150 or more (labor costs for self-installed projects cannot be included).

Electric Heat (with or without air conditioning)

Attic/Ceiling Insulation	60% up to \$600
Wall Insulation	60% up to \$600
Foundation Insulation	60% up to \$600
Infiltration Control	60% up to \$200
Duct Insulation/Sealing	60% up to \$200
Maximum rebate per home	\$2,200

Central AC Only (non-electric heating)

Attic/Ceiling Insulation	15% up to \$150
Wall Insulation	15% up to \$150
Maximum rebate per home	\$300

LIHEAP Qualified, no LIHEAP covered costs
(Same above requirements apply)

Electric Heat (with or without air conditioning)

Attic/Ceiling Insulation	80% up to \$800
Wall Insulation	80% up to \$800
Foundation Insulation	80% up to \$800
Infiltration Control	80% up to \$200
Duct Insulation/Sealing	80% up to \$200
Maximum rebate per home	\$2,800

Central AC Only (non-electric heating)

Attic/Ceiling Insulation	20% up to \$150
Wall Insulation	20% up to \$150
Maximum rebate per home	\$300

NEW HOME CONSTRUCTION

All Star Home Requirements: **\$500/home**

- Energy-Efficient Home Construction: High performance insulation and windows.
- High Efficiency Heating and Cooling: Requires geothermal, cold climate air-source heat pump or ENERGY STAR® air-source heat pump.
- Efficient Electric Water Heating: Requires the installation of a heat pump water heater or geothermal assisted electric water heater.
- ENERGY STAR electric clothes washer, clothes dryer, dishwasher and refrigerator.

Premier Electric Home Requirements: **\$200/home**

- Standard air-source heat pump or better
- Electric resistance water heater or better
- Building shell checklist

CREATE A HEALTHY HOME

Keep it Safe
Properly label and store poisons out of the reach of children. Secure loose rugs and keep play areas free from hard or sharp surfaces. Install smoke and carbon monoxide detectors and keep fire extinguishers on hand.

Keep it Well-ventilated
Ventilate bathrooms and kitchens; consider using heat/energy recovery ventilation to reduce the concentration of contaminants in the home.

Keep it Contaminant-free
Reduce lead-related hazards in pre-1978 homes by fixing deteriorated paint, and keeping floors and window areas clean using a wet-cleaning approach. Test your home for radon, a naturally occurring dangerous gas that enters through soil, crawlspaces, and foundation cracks. Install a radon removal system if levels above the EPA action-level are detected.

Thermally Controlled
Houses that do not maintain adequate temperatures increase the risk for inhabitants to be exposed to extreme cold or heat.

2026 MAQUOKETA VALLEY ELECTRIC COOPERATIVE REBATES

Contact the cooperative for the complete list of rebates and qualifications

WATER HEATERS

Heat Pump Water Heater
ENERGY STAR® Integrated Unit \$650/unit

High Efficiency Electric Water Heaters
Electric Resistance Unit \$75/unit
(not less than 40 gal. tank - min. EF ≥ 0.90)

Electric Resistance Unit \$125/unit
w/1st Time Heat Plus
(not less than 40 gal. tank - min. EF ≥ 0.90)

Geothermal Assisted Storage Unit \$150/unit
(not less than 40 gal. tank - min. EF ≥ 0.90)

Beneficial Electrification(BE) Incentive
Go Electric Bonus \$100

When a resistance or HPWH unit is replacing a natural gas or LP unit, or for new accounts.

NEW! Energy Assessment Incentives
See form for details. Earn money back when you complete selected energy efficiency measures after an assessment performed by MVEC’s Energy Advisor. Incentives vary.

HEATING & COOLING

Groundsource Heat Pump

Closed Loop System	\$500/ton
Open Loop System	\$300/ton
<i>No “pump & dump” systems</i>	
Hybrid System with Gas Backup	Add'l \$100/ton
Unit Replacement	\$200/ton

Air-Source Heat Pump, Including Minisplits

Cold Climate Heat Pump	\$450/ton
Standard Air-Source Heat Pump	\$150/ton
New Hybrid Air-Source Heat Pump Bonus	\$100/ton
ENERGY STAR Heat Pump	\$200/ton + \$250

Split system or single package:
Min. SEER 17.75, EER 12.48, HSPF 9.6
Min. SEER2 16.9, EER2 12, HSPF2 8.2

NEW! Heat Pump Checkup \$50/every 3 yrs.
See form for details. Earn money back just by having your ground source or air source heat pump checked. This rebate may be submitted every 3 years.

Indoor Air Quality

Energy/Heat Recovery Ventilator (ERV/HRV)	\$250/unit
---	------------

Equipment must serve the entire conditioned space of the home. Limit of two HRVs per home.

ENERGY STAR APPLIANCES

ENERGY STAR Clothes Washer

ENERGY STAR qualified <i>(must have electric water heater)</i>	\$40/unit
---	-----------

ENERGY STAR Electric Clothes Dryer

ENERGY STAR qualified	\$20/unit
-----------------------	-----------

Single Family Home Energy Consumption

Why Electrify?

Heating is the largest energy use for homes in Iowa and provides the biggest opportunities to save. When properly installed, an ASHP can deliver one and a half to three times more heat energy to a home than the electrical energy it consumes. As a result, some of these systems can provide heat at a higher efficiency and lower cost than electric resistance heating, oil, or propane heating systems—and in some cases, for a lower cost than gas heating as well.

EV LEVEL II CHARGERS

The cooperative will rebate 50% of the installed cost, up to a \$500 rebate, for electric vehicle Level II chargers requiring a 240/208 volt input supply. The primary charging location of the EV must be at the home address of the distribution cooperative member. Wiring rebates may also be available to offset cost of Level II charger installation.

The cooperative will rebate \$200 for an EV ready certified home that has 240/208 volt wiring with 50 amp breaker (to support 40 amp charging) box on the back or side wall of garage with NEMA 6-50 or 14-50 outlet. Contact the cooperative to learn more.
