How To Extend Your Wi-Fi Outdoors

It's great to be able to seamlessly connect to your Wi-Fi devices throughout your home, but frustration often starts the moment you try to connect your Wi-Fi network to a device outside. You can move your router as close to your yard as you can, but that won't always solve the problem.

With the increasing number of outdoor smart devices like lighting, security cameras and grills, you need to be able to extend your Wi-Fi beyond your home's exterior walls. It can be tricky, but with the right system you'll be streaming video by the pool and posting pics to social media in the yard in no time.

Our Mesh Wi-Fi units may be the answer. This technology combines a Wi-Fi router with one or more satellites, which are small wireless devices you place in different places. These satellites communicate with the router and provide you with a strong Wi-Fi signal everywhere in your home and even into your backyard.

Advantages of Mesh Wi-Fi

- Our Mesh Wi-Fi satellite units, when combined with our Wi-Fi router, will provide coverage for your home and yard.
- With the Wi-Fi router/Mesh combination MVlink's tech team is just a phone call away to access your network and remotely figure out the source of any technical issues.

In addition to solving your biggest home Wi-Fi challenges, and giving you outstanding performance, Mesh Wi-Fi is cost-effective. You can purchase a mesh unit from MVEC for a one-time charge of \$90 plus tax. The Mesh Wi-Fi unit, combined with MVlink's router, will extend your network even further than a router alone and provides a complete managed solution.

If you're ready to enjoy the superior online experience and other benefits that come with MVlink, contact us today. We'll set you up with everything you need to upgrade your current Wi-Fi network to a high-performance Mesh Wi-Fi system and provide you the support you need so you can enjoy worry-free Wi-Fi that just works. You also might want to think about upgrading your speed when you start adding more smart devices.

Now that you know how to bring your Wi-Fi outdoors, here are some smart backyard gadgets to help bring the technological comforts of your home to your backyard.

Smart Pool Cleaner -

Keeping your pool clean requires more than just scrubbing the walls and changing the filter. You need to monitor the pH levels of your water. Just toss this device in your pool and it will show you temperature, chemical levels, and even the weather.

Wi-Fi Padlock - The design makes it ideal for locking gates and sheds, especially if you need an easy, secure way to allow people in.

Outdoor Smart Plug - Outdoor Smart Plug lets you add timers and voice assistant controls to your patio light, pool filter, or anything else you plug in.

Bluetooth Speaker - You don't need to run special wires outside to have music in your yard, you can get a Bluetooth speaker. These powerful little speakers are reasonably priced and waterproof so you can keep one on the patio or near the pool.

Smart Grills - Whether you prefer to cook with electric, wood pellets, charcoal, or gas, there are now Wi-Fi grills, that make it possible to BBQ while you cut the grass, watch the game, or take a nap. Wireless contact with your grill allows you to raise and lower the temperature and receive alerts when your food is ready.

With all of these smart toys and your Wi-Fi perfectly extended outside, you should have no problems hosting the perfect summer party or barbecue, unless it rains.
